New Workflows in NoSQL Schema Management

Josch

- ➤ uses MongoDB
  (but not limited to it)

- ➤ integrates third-party
  schema extraction tools

- ➤ integrates third-party
  schema containment checkers

- ➤ and contains many more features

*for a novel end-to-end workflow
for schema management*

By interacting with Josch, we identify…

- ➤ a new end-to-end schema management workflow

- ➤ limitations and new research challenges in
  current JSON Schema Extraction and
  JSON Schema Containment tools

- ➤ new research challenges in schema management
